

VB-FULLAIR-4C

making everyday smoother

airsuspension

- Increased comfort • Better driveability • More safety

IVECO DAILY

60C-65C

PRODUCT SHEET

PRODUCT SHEET

Airsuspension systems for light commercial vehicles and camping-cars have become a commonly specified option in recent years. Now, the Iveco Daily has also an own solution, developed by VB-Airsuspension in Holland, in the form of an integrated 4-Corner air suspension system. It is technically possible to equip the Iveco Daily 60C-65C camping-car with the newly developed and innovative VB-Airsuspension system.

Changing height

The vehicle level can be changed manually with the standard handheld remote when the vehicle stands still; therefore lowering of the chassis/ load platform is one of the systems standard possibilities.

Software

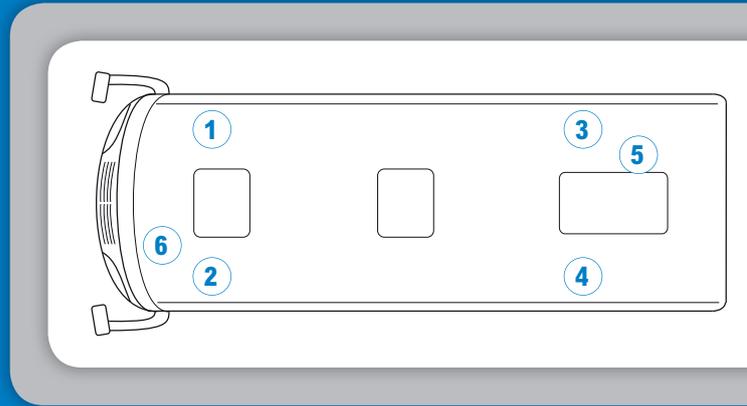

The electronic part of the front- and rear axle air-suspension is compatible with the vehicle's main electrical system. Various software variants create the possibility to adapt the VB-FullAir-4C air suspension to the specific use of the vehicle.

VB-Autolevel

For the Iveco Daily 60C-65C model there is another option available, the VB-Auto Level. This feature gives the user the possibility to level the vehicle on the spot, when parked on an uneven surface. By pushing one button the vehicle will adjust quickly and smoothly to horizon level. The maximum range of travel of the Auto Level function is 140 mm.

Dealer:

Advantages VB-FullAir-4C:

- Improved suspension comfort
- Constant ride height
- Improved road handling and stability
- Increased protection of vulnerable / sensitive goods
- Less impact for passengers
- Kneeling facility
- Less wear of tyres / brakes
- Environmentally friendlier, less CO² emission

VB-FullAir-4C system

The VB-FullAir, a full-air air-suspension, has an electronic system named VB-ASCU (VB-Air Suspension Control Unit), which automatically monitors and adjusts the ride-height of the vehicle. This constant monitoring and adjusting (independent of the load, in the longitudinal and lateral direction, regardless of the centre of gravity) will automatically contribute to safer vehicle behaviour and improved comfort.

Supply and service

The air-suspended Volkswagen T5 can be supplied and serviced by VB-Airsuspension dealers. The fully developed VB-rear-axle air suspension is also available for ALL Iveco Daily 60C-65C models as an after-market solution through the VB-Airsuspension network.

VB-Airsuspension specifications*:	Front	Rear
Standard rideheight	720 mm	790 mm
Rideheight with VB-FullAir-4C	590 mm	695 mm
Highest position	+50 mm	+25 mm
Lowest position	-50 mm	-75 mm

Heights are measured from wheel arch to ground at the wheel centre.
